

Technical Information

80-30

Additive Plast

Additive Plast

Plastic additive for all paintable plastics used in combination with baslac wet-on-wet primerfillers. Provides good adhesion on plastics.

- If needed, the product can be applied to bordering e-coated parts.
- The use of 80-30 on polypropylene (PP) and polyethylene (PE) does not provide sufficient adhesion and is therefore not recommended.

Please note: For automotive refinish, repair instructions of vehicle manufacturers, in particular regarding installed sensor technology, must always be observed in addition to the processing instructions given within this document.

Safety advice:

The products are suitable for professional use only.
It cannot be ruled out that this product contains particles < 0.1 µm.
